JNC Powder Coating

Founded in 1989 JNC Fencing quickly established itself as a market leader in the Security Fencing Industry. Offering excellent workmanship and service came hand in hand with reliability leading to the establishment of a sister company. In 1997, JNC Engineering opened and quickly established a firm base with the capability of mass production of the core items but also the skill, workforce and modern equipment to enable us to manufacture customised requests on demand.

We believe in offering our products at the best competitive prices and terms available, and with our own transport and delivery system and newly constructed purpose-built offices, excellent customer service and care is ensured at all times. Included here is a sample of what we can do. If you don't see what you require contact us and a prompt reply will follow.

JNC POWDER COATING
PROFESSIONALS

Powdercoating Facility In-house...

JNC Powdercoating, Ireland's most sophisticated powdercoating facility, is open for business. Our plant is equipped with automated conveyors and spray booths and supersized ovens.

We have completed an independent saltspray test on galvanised products. This means that we can guarantee that our powdercoating has a 10 year guarantee finish. Our investment means that we can offer you quality and reliability, and exceptional service. In fact, we pride ourselves on our service.

Sounds good? Why not call us and we can chat about what we can do for you.

Terms & Conditions Apply

All weather pitch surrounds, multi sports facilities, spectator rails, hockey rebound boards, durable & low maintenance sports systems, roof nets, recess goals, concrete plinth's and certified ball stops.

Sports Fencing Specialists...

To develop a winning team you need to set your goals, commit to the task, cooperate with your team members, communicate and contribute.

J.N. Cummins and Co. championed the idea of developing a specialist panel for use on sports pitches throughout Ireland. With the help of sports clubs and societies around the country, J.N. Cummins & Co. developed the JNC Sports Surround System with durability, maintenance & cost effectiveness in mind. The result was a modular design, which can be adapted to enclose any number of sports areas.

The JNC Sports Surround System panels are supplied fully welded resulting in quick, safe, plus simple installation. JNC Sports Surround System can be installed up to 6.0 metres in height. Brackets or full-length clamp strips can be used to give a safe, secure and vandal resistant fixing. The mesh aperture allowed on the first 1.20m is 66*50mm increasing to 200*50mm for the remainder. The wire diameter on our panel is 8mm double horizontal and 6mm vertical.

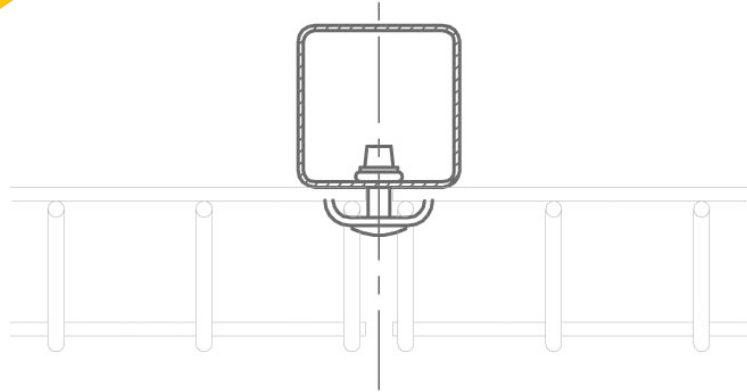

Call us today and the JNC specialist sports surround team will assess the needs of your club and design a product that is perfect for you!

Become part of a winning team with JNC.
