Commercial fencing specialists since 1990

ABOUT US

Engineered for excellence.

JN Cummins & Company Ltd has been in operation for almost 35 years. We have been part of government fencing framework projects along with fencing some of the top GAA stadiums in the country which include: Semple Stadium, Pearse Stadium and Pairc Ui Chaoimh.

Established in 1990, JNC Fencing quickly gained recognition as a leader in the security fencing industry, known for exceptional craftsmanship, reliable service, and a commitment to excellence.

In 2016, we expanded further with the launch of JNC Premier Pitches, providing top-tier all-weather and natural sports pitches for various disciplines, including GAA, rugby, soccer, hockey, tennis, and multi-use games areas (MUGAs) tailored for schools with limited space. We deliver a comprehensive, turnkey solution, managing every step from design to the final handover of a fully completed, floodlit pitch.

JN Cummins & Co. Ltd. is proud to be ranked among Ireland's Top 200 Construction Companies and is a premier specialist in industrial security fencing. From our fully integrated manufacturing facility in Cashel, Co. Tipperary, we supply a comprehensive range of mesh panels and custom solutions throughout Ireland. This includes bespoke gate systems, available in manual or automated configurations, whether swing, sliding, or cantilever designs.

PRODUCTS

Palisade

Palisade fencing is the ultimate solution for robust, high-security applications, offering tailored protection for both critical infrastructure and general-purpose needs. Its distinctive design provides a formidable barrier that is difficult to breach, making it an ideal choice for safeguarding sensitive areas like data centres, utilities, and transportation hubs. From Data Centre Fencing to Irish Rail Specified Palisade, these systems are engineered to deliver unparalleled durability, reliability, and peace of mind.

Every component of our Palisade range is designed to integrate strength, versatility, and dependability, ensuring that it meets the challenges of modern security demands. Whether you're securing industrial facilities, commercial properties, or public spaces, our Palisade fencing offers a proven solution that combines functionality with a professional, uniform appearance. Built to last and customisable to your specific requirements, this fencing system delivers both the high-security standards you need and the durability to withstand the test of time.

PRODUCTS

Railings

Railings offer a strong, stylish, and versatile fencing solution that caters to a wide range of applications, making them a popular choice for diverse environments such as schools, playgrounds, car showrooms, religious sites, and car parks. Designed to meet varying needs, our railings provide a perfect blend of durability and aesthetics, ensuring they are both functional and visually appealing.

Our General Purpose Railings strike a balance between strength and elegance, making them ideal for residential properties, commercial premises, and public spaces. Available in a variety of styles, including Bow Top, Square Bar, Twisted Designs, Ornamental Baskets, and Scroll Details, these railings can be tailored to match the character and purpose of any setting. For enhanced safety or decorative appeal, they can feature dome tops, while pointed tops are available for projects requiring higher security.

For applications requiring enhanced safety and access control, our Security Railings deliver robust protection without compromising style. Constructed with precision and attention to detail, they meet the highest standards of functionality and reliability, making them ideal for safeguarding schools, parks, industrial sites, and other sensitive areas.

PRODUCTS

Gates

Swing, Sliding, Cantilever

JNC provides a comprehensive range of secure and customizable gate solutions, including swinging, sliding, and cantilever gates, tailored to suit various site requirements and integrate seamlessly with our fencing systems.

Gates can be: integrated with all modern security solutions: automated , key pads , push pads, emergency push pads , dial to open, face recognition, CCTV

Swinging Gates

JNC gates offer both style and security; gates can be manufactured to customised heights and widths and will match in with our palisade/railing fence. Gateposts can be base-plated to enable rawl bolting.

Sliding Gates & Cantilever Gates

In confined or restricted areas or where it is not permissible to specify a swing gate JNC Sliding gates are the answer. Supplied in heights to match the specified fencing in configurations up to 15m wide as standard. We also manufacture Cantilever gates which will eliminate the need for a ground track and all gates can be automated.

Gates are available
to match all fencing
types & styles.

PRODUCTS

Spectator & All Weather Pitch Fencing

The JNC Spectator 868 Fencing system is a robust and versatile solution designed for sports fields and spectator areas where medium-impact resistance is required. Its primary features make it a reliable choice for ensuring safety, visibility, and durability in public spaces.

1. **Robust Panel Design:** The Spectator 868 fencing is composed of steel welded mesh security panels. These panels provide excellent structural integrity, with a height of 1.20 meters, suitable for ensuring both safety and comfort for spectators. The rebound panel is also perfect for sports environments, as it is designed to withstand moderate physical impact.
2. **Durable Material Construction:** The system complies with several industry standards, including EN-ISO 10244-2:2009 for commercial galvanization, EN-ISO 13438:2013 for powder coating, and BS1722-14:2006 for fencing standards. This ensures that the fence is corrosion-resistant, weatherproof, and long-lasting, even in demanding outdoor environments.
3. **Powder Coating and Galvanization:** The fence components are galvanized and powder-coated to prevent rust and enhance durability. The standard colours available include RAL6005 Green and RAL9005 Black, with additional colours offered upon request to match the aesthetic requirements of the venue.
4. **Enhanced Security:** The system is classified under security level Category 1 (subject to specific maintenance terms and conditions). This makes it suitable for areas requiring a basic level of security without compromising spectator comfort. The fence also features a JNC Type 2 security bracket, M8 bolts, and steel fixings, ensuring the panels are securely fastened and tamper resistant.

5. **Safety-Oriented Design:** The top rail and capping system designed by JNC ensures that there are no overhanging parts on the panel, minimizing the risk of injury. This makes the Spectator 868 a safe option for public areas where children and adults are present.
6. **Installation Options:** The fencing system is available with either base-plated posts or posts that can be dug into the ground, providing flexibility for different installation environments. Gates in swinging, sliding, and cantilevered designs are also available to match the fencing system, ensuring smooth access control.
7. **Customization and Accessories:** JNC offers customization options, including powder coating in club or venue colours, as well as additional features like kicker or rebound boards for sports like hockey. This adds to the fence's versatility, extending its application in various sports fields.

In summary, the JNC Spectator 868 Fencing system is ideal for venues requiring a balance of security, durability, and spectator comfort. Its robust construction, high-quality materials, and thoughtful design elements make it a preferred choice for sports fields and spectator areas.

Gates are available

- Retro fits, repairs & replacement nets
- Ask about our unique Dual Cable System to stop nets “bellying”

Gates are available to match all fencing types & styles.

OUR RESOURCES

What we offer.

At JNC Fencing, we pride ourselves on being the largest fencing stockholder in Ireland, offering unmatched resources and expertise to meet the needs of projects of all sizes. Our comprehensive capabilities ensure quality, efficiency, and reliability in every aspect of our service.

Extensive Stockholding

As Ireland’s largest fencing stockholder, we maintain an extensive inventory of materials, ensuring fast turnaround times and the ability to handle even the largest orders with ease.

Experienced Crews Covering Ireland

Our highly trained and experienced crews operate nationwide, providing expert installation and maintenance services. Whether your project is in a rural location or a busy urban setting, we have the team to deliver exceptional results.

State-of-the-Art Fabrication & Welding Facility

Our in-house Fabrication and Welding Factory employs a skilled team of 25 professionals dedicated to crafting bespoke fencing solutions to the highest standards. This facility allows us to provide tailored products with precision and speed.

Powder Coating Capabilities

We offer in-house powder coating services to add durability and a professional finish to all fencing materials. This enables customization, such as matching specific colours for branding or blending with the environment, while ensuring long-lasting protection against weathering.

Specialised Plant and Machinery

Our investment in modern plant and machinery ensures we can handle complex projects with efficiency and accuracy. From site preparation to installation, our advanced equipment guarantees precision and reliability.

Dedicated Transport Fleet

With our own transport fleet, we ensure timely delivery of materials and equipment, minimising delays and providing flexibility for our clients’ schedules.

Health and Safety Compliance

Health and safety are at the core of everything we do. We adhere to the highest standards of compliance, acting as PSCS (Project Supervisor Construction Stage) and PSDP (Project Supervisor Design Process) where required, ensuring the safety of all stakeholders on-site.

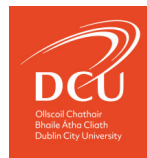

Established and Secure

With decades of experience and a reputation built on trust, JNC Fencing is an established and secure choice for all your fencing needs. Our proven track record of delivering exceptional results across Ireland reflects our commitment to excellence.

At JNC Fencing, we combine resources, expertise, and dedication to provide industry-leading fencing solutions that stand the test of time.

TESTIMONIALS

What our clients say

WARD & BURKE

"JNC Fencing has been an invaluable partner for Ward & Burke over the past 4 years, delivering over 100 projects as part of the Uisce Éireann Site Security Framework. Their expertise in providing palisade and mesh fencing, swing and cantilever gates, as well as handling site clearance and associated civil works, has consistently exceeded our expectations.

JNC's commitment to quality and efficiency is unmatched. Every project has been completed on time, within budget, and to the highest standard. Their ability to resource projects effectively, no matter the scale or complexity, demonstrates their dedication to client satisfaction.

We highly recommend JNC Fencing for any organization seeking reliable, high-quality fencing solutions. Their professionalism and attention to detail make them a trusted partner in our operations."

**Eugene Fitzgerald,
Senior Contracts Manager,
Ward & Burke.**

"We at John Paul Construction were delighted to partner with JNC Fencing for the fencing and access solutions at the new Abbots Manufacturing Facility in Kilkenny. The project involved the installation of over 800 meters of high-quality estate railings and gates, as well as 2.20m RAL 9005 -welded palisade fencing, mesh fencing, swing and sliding gates.

JNC's ability to resource and adapt to the dynamic needs of the project was impressive. Their team delivered on quality and adhered to the highest health and safety standards throughout. All materials, including the hot-dipped galvanised and RAL 9005 powder-coated finishes, exceeded our expectations in durability and aesthetics.

We would highly recommend JNC Fencing to any organization seeking reliable, professional, and top-quality fencing solutions.

**John Gahan,
John Paul Construction**

"Over the past 10 years, Conack Construction has collaborated with JNC Fencing on numerous projects, including schools, retail parks, warehouses, and housing. Throughout our partnership, JNC has consistently proven to be a reliable and resourceful fencing contractor. Their ability to deliver secure, high-quality solutions within agreed lead times has been a cornerstone of their service.

The quality of their materials and workmanship is second to none, ensuring durability and compliance with the highest standards. JNC's commitment to excellence and professionalism has made them a trusted partner for Conack Construction. We look forward to continuing this strong partnership in the years to come."

**Kevin Nolan,
Regional Commercial Director,
Conack Construction.**

"I have had the privilege of working with JNC Fencing for over 22 years on a diverse range of projects, including pharmaceuticals, warehousing, retail, rail track, data centres, water treatment plants, ESB substations, and utilities.

JNC consistently stands out for their exceptional resource management, well-maintained machinery, and ability to deliver secure, high-quality fencing solutions. Their emphasis on health and safety aligns perfectly with the standards we uphold at John Sisk & Son, ensuring every project is executed to the highest level of safety compliance.

From the Foynes to Limerick Railway track to the Astellas Project in Tralee, Athlone CNU, Avondale House & Forest Park, AstraZeneca in Blanchardstown, Takeda in Grangecastle, and Vistakon in Limerick, JNC has been instrumental in delivering complex projects on time and to an exceptional standard.

Their reliability, resourcefulness, and commitment to using top-quality materials and workmanship make them a valued partner. I have complete confidence in JNC's ability to meet and exceed the demands of any project."

**Richard Morrissey,
Senior Commercial Manager,
John Sisk & Son.**

PROJECTS

Abbott

Main Contractor: John Paul Construction

Client: Abbott

Location: Kilkenny

Products Used:

- JNC Palisade: Standard Rounded & Notched Panels & Full pale bespoke design, tailored to meet the highest security and aesthetic standards.
- JNC Cantilever Gates: Seamless operation and robust construction for reliable site access.
- Swing Gates: Precision-engineered for durability and style.
- Estate Railing and Gates: A timeless solution combining functionality with elegance.
- JNC Resista: Exceptional resistance and durability, ensuring long-term performance.

Manufacturing Excellence:

All products were proudly manufactured at JNC's Cashel Engineering Works, ensuring precision, quality, and adherence to industry standards.

Powder Coating Expertise:

With in-house powder coating capabilities at our own factory, JNC guarantees a flawless, long-lasting finish in compliance with BS1461, BS649, and BS1722 standards.

Why Choose JNC?

Depend on JNC's unmatched quality backed by over 35 years of expertise, a 10-year quality guarantee, and client-focused solutions tailored to meet unique project needs. Partner with JNC Fencing – Ireland's leading fencing supplier – for security, durability, and design excellence.

PROJECTS

Foynes to Limerick Fencing Project

Main Contractor: John Sisk & Sons

Client: Irish Rail

Location: Foynes to Limerick

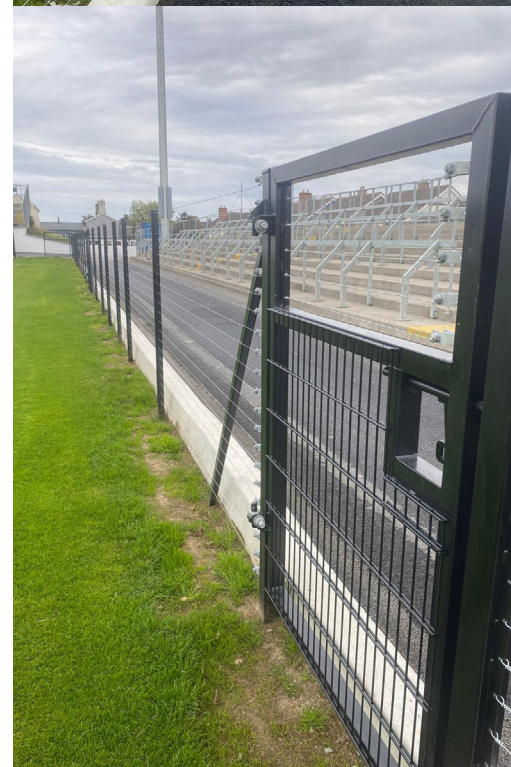

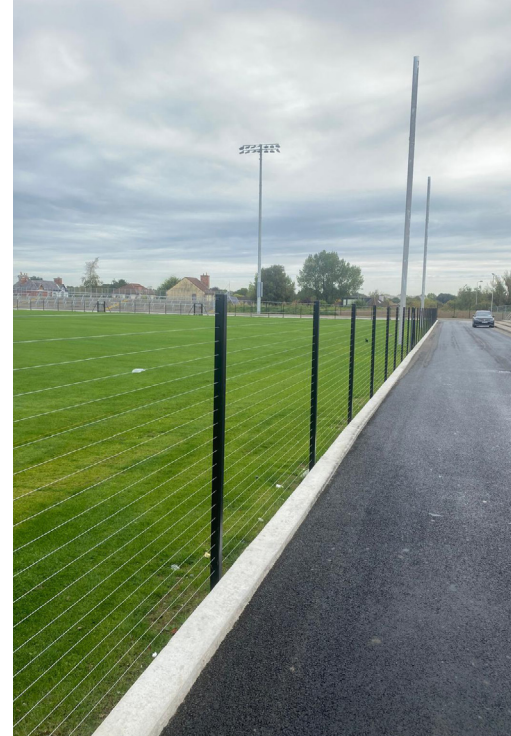

Project Description:

JNC Fencing has been contracted by John Sisk & Sons as the main contractor, to deliver a comprehensive fencing solution for the 42-kilometre rail line from Foynes to Limerick for our client Irish Rail. This project involves the installation of extensive fencing to ensure security, safety, and functionality along this important railway route.

Fencing Solutions Provided:

- JNC Irish Rail Palisade (10 Kilometres): A robust, high-security palisade fencing designed specifically for railway applications, covering 10 kilometres of the route. This fencing provides durable protection in areas where high security is critical.
- JNC Concrete Posts & Sheepwire (30 Kilometres): Resilient fencing with concrete posts and sheepwire, ideal for rural and less secure areas. This fencing solution covers 30 kilometres, offering containment and safety while blending with the surrounding landscape.
- Swinging and Sliding Gates: Custom-built gates with both swinging and sliding mechanisms to control access at designated points along the route, ensuring secure and flexible entry for maintenance and operational needs.
- JNC Doublebeam (5m High): Specialized doublebeam fencing installed in specific high-security areas, providing extra height and strength to prevent unauthorized access.

This large-scale fencing project demonstrates JNC Fencing's ability to deliver tailored, high-quality solutions for complex infrastructure needs. The mix of palisade, concrete post & sheepwire, and high doublebeam fencing ensures a secure boundary that meets the operational requirements of Irish Rail on this significant route.

PROJECTS

St Conleth's Park (GAA)

Main Contractor: Elliott Group Ltd

Client: Kildare CLG

Location: Newbridge Co.Kildare

Scope of Work:

JNC Fencing was contracted to deliver a comprehensive fencing and pitch infrastructure package for Kildare CLG's state-of-the-art sports facility. The project combined JNC's expertise in fencing solutions and sports pitch construction to meet the client's needs for durability, safety, and aesthetic appeal.

Key Deliverables:

Crowd Control and Pitch Protection Fencing:

- Installation of JNC Strained Wire System, designed to provide robust pitch protection while maintaining excellent visibility for spectators and TV cameras.
- All components were manufactured in-house and powder-coated in-house to the highest standards, ensuring durability and compliance.

Car Park Fencing:

- Sturdy and visually appealing fencing solutions to delineate parking spaces, enhance security, and streamline traffic flow within the facility.
- Generator and Water Harvesting Compound:
- Custom fencing systems to secure and protect critical utility areas, including the generator and water harvesting installations.

Biocycle Compound:

- Bespoke fencing to enclose and secure the biocycle unit, ensuring operational safety and environmental compliance.

All-Weather Grass Installation:

- JNC Premier Pitches, a specialist division of JNC Fencing, delivered all-weather grass surfaces for the sidelines, providing a durable and professional-grade finish that complements the main pitch.

PROJECTS

Irish Water

Main Contractor: Sorensen Civil Engineering

Client: Uisce Éireann

Location: Youghal

Project Description:

Youghal WWTP Cork, Installation for Sorensen Civil Engineering & Uisce Éireann. JNC Fencing is proud to showcase our completed project in Cork, carried out in partnership with Sorensen Civil Engineering for Uisce Éireann. This project demonstrates our commitment to delivering tailored, high-quality fencing solutions.

Scope of Work

- Fencing: Manufacture, supply, and installation of 750 metres of 2.40m JNC Palisade fencing, utilizing both welded and bolted formats for enhanced strength and durability.
- Gates: Installation of 8 double-leaf swing gates, providing secure and reliable access points.
- Finish: All elements were hot-dipped galvanised for maximum corrosion resistance and powder-coated in RAL 6005 (green) for a premium finish that blends seamlessly with the environment.

Key Features

- Health & Safety Excellence: Adhering to the highest standards, ensuring a safe and efficient work environment throughout the project.
- In-House Expertise: All work was completed using JNC's own plant and machinery, showcasing our self-sufficiency and capability to manage projects of this scale.

With over 35 years of experience and a reputation for precision, JNC Fencing continues to set the standard in fencing solutions for Ireland's most demanding infrastructure projects.

PROJECTS

Iarnród Éireann

Main Contractor: JNC Fencing

Client: Iarnród Éireann

Location: Skerries, Co. Dublin

Project Description:

JNC Fencing successfully delivered a challenging night works project for Iarnród Éireann, installing:

- 500 meters of 2.40m-high JNC Irish Rail Palisade fencing.
- 150 meters of JNC Resista fencing.

The work was carried out alongside the live Dublin to Belfast railway track and completed within a tight timeframe over a bank holiday weekend. Our crews, fully PTS-trained, managed complex traffic management and site clearance, ensuring minimal disruption to operations.

Health and safety was paramount, with meticulous planning and execution under strict guidelines, showcasing JNC's expertise in high-pressure environments.

JNC Fencing – Securing Ireland's critical infrastructure, one project at a time.
